Product Description

Rubber Artificial grass Sports field Elastic Base 17.1mm Without Concrete With Shock Absorption And Drainage

Product advantages

The "chain-type" product can realize large-area installation with high efficiency, no bulge, no dislocation, and no shift, etc.

The "chain-type" product can fix the ground base tightly, even if the ground is slightly cracking or collapse, the overall flatness and firmness of the site can still be protected.

Product Features

1	The hydrophobic function to ensure smooth drainage, and no ponding in the rainy days. Available for all-weather use.
2	In winter, rubber will not get brittle like plastic products, its sufficient elasticity can protect the human body from impact.
3	The shock absorbing function makes the product neither very soft to let the athletes feel weak, nor too hard to lose the protection.
4	15 years service life .
5	Environmental safety, realize the recycling by the manufacturer, no waste of resources. It is real green and sustainable production.
6	Product will not get deformed. The installation is very simple, even non-professional people can complete the installation so to lower down the costs. Good to be applied for non-filling artificial grass field.
7	Available for small or difficult venues, such as building top, underneath bridge, etc. The transportation of the product is convenient, flexible and fast, and also can be collected quickly.
