Product innovation points and analyst

Material---The perfect combination of new environmental protection resin and rubber foam, rubber has a strong tensile strength and softness, which ensure the strong elasticity and softness brings sense of comfort at the same time. The UV resistant film brings the long service life for the shock pad who is more environmentally friendly, no odor.

Cutting technology---Cutting grooves [vertically and horizontally](#) with holes to make sure water drainage in four directions, and installation more even.

Tensile strength---Three-layer structure and characteristics of rubber makes the shock pad with the strong tensile strength, which will protect the product from deformation and damage during the installation. Tensile strength of one-time forming process product is poor.

Product advantages

Light in weight, easy to transport and convenient installation

Length can be customized according to the pitch
