## Product Description

### 12mm Thickness PE Foam Shock pad close celled 20mm Shock Pad Underlay for Artificial grass

#### Product innovation points

**Structure**---Our shock pad has been adopted proportion 4:6 and three-layer composite technology. Compared with one-time foaming process product, one-time foaming product is easily deformed, and elasticity lost too quickly make it difficult to restore elasticity after long-term use.

**Material**---The perfect combination of new environmental protection resin and rubber foam, rubber has a strong tensile strength and softness, which ensure the strong elasticity and softness brings sense of comfort at the same time. The UV resistant film brings the long service life for the shock pad who is more environmentally friendly, no odor.

**Cutting technology**---Cutting with holes to make sure water drainage in four directions, and installation more even.

**Tensile strength**---Three-layer structure and characteristics of rubber makes the shock pad with the strong tensile strength, which will protect the product from deformation and damage during the installation. Tensile strength of one-time forming process product is poor.
