

Three Layers Polyethylene Foam Shock Pad 1.5m Width 10mm Thickness For Artificial Turf

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TAIHUI
- Certification: SGS/LABOSPORT/SPORTSLABS
- Model Number: T2004B/2006K
- Minimum Order Quantity: ACCORDING TO THE DEMAND FROM THE CUSTOMER
- Price: By negotiation
- Packaging Details: In roll
- Delivery Time: 10 days after received the deposit
- Payment Terms: T/T or L/C,
- Supply Ability: 500,000 sqms per month

Product Specification

- Product Name: CrossLink Foam Shock Pad
- Application: Artificial Turf Sports Field
- Structure: Three Layers
- Length: Tailored For Pitch
- Thickness: Customized
- Width: 1.5 Meter
- Material: New Environmental Friendly Resin
- Color: Black&blue
- Highlight: **Three Layers Foam Shock Pad, Polyethylene Foam Shock Pad, 10mm artificial turf foam pad**

Product Description

Three Layers Polyethylene Foam Shock pad 1.5m width 10mm thickness For Artificial Turf

Specifications:

| | |
|--------------------|-------------------------|
| Color | Black&blue or Black&red |
| Structure | Three layers |
| Material | PE foam |
| Thickness | 10mm |
| Length | Tailored for pitch |
| Width | 1.5 meter |
| Installation guide | Yes |
| Drainage | Good |
| Flame retardant | Yes |
| Warranty | 20 years |

Our shock absorbing underlay for artificial grass is made of three layers with film on the backing to enhance the tensile strength and UV protection in black and blue bicolor. It helps to reduce the overall cost of the artificial grass system, enhance the performance and extend the life span of the system.

Description:

Structure---Our shock pad has been adopted proportion 4:6 and three-layer composite technology. Compared with one-time foaming process product, one-time foaming product is easily deformed, and elasticity lost too quickly make it difficult to restore elasticity after long-term use.

Material-The perfect combination of new environmental protection resin and rubber foam, rubber has a strong tensile strength and softness, which ensure the strong elasticity and softness brings sense of comfort at the same time. The UV resistant film brings the long service life for the shock pad who is more environmentally friendly, no odor.

Cutting technology---Cutting grooves [vertically and horizontally](#) with holes to make sure water drainage in four directions, and installation more even.

Tensile strength---Three-layer structure and characteristics of rubber makes the shock pad with the strong tensile strength, which will protect the product from deformation and damage during the installation. Tensile strength of one-time forming process product is poor.

Applications:

Products are mainly used for soccer, rugby, hockey, badminton, golf greens, golf mats, children safety system, tennis and sports recreation area .

Competitive Advantage:

Cost

Our shock pad can be installed directly on the water stabilized base, and then covered by artificial turf, which helps to save the cost of concrete or asphalt base.

Part of the Artificial turf performance is provided by the shock pad, so the artificial turf grades can be appropriately traded down to only wear-resisting and UV resistant artificial turf.

Artificial grass pile height 40 mm filled with quartz sand and granules, whose overall cost is lower than the traditional grass pile 50mm without any infill.

Performance

Our product is light in weight and easy to install which shorten the installation period and reduce the cost.

Product has excellent shock absorption and ball rebound performance, bring happiness to the sports and avoid injury, which can be close to the natural grass feeling at the most.

Roll length can be customized according to the pitch

No pulverize or rot, long life span

Closed-cell foam product does not absorb water, which makes the installation easy and not influenced by the weather.

Heavy-duty machine has no problem to move on its flat surface.

Special porous design ensures the good water permeability, so there is no water on the artificial grass, and activities can be proceeded in the rainy days.

Elegant appearance and strong sense of comfort.

Three layers' design to maximize shock absorption and minimize vertical deformation

Some references on site

We manufacture shock pad underlay and rubber granule infill to support artificial turf pitch for sports and landscaping. Trust we will support you by excellent quality and friendly price. Our products will make your artificial turf pitch fantastic!

Welcome for any inquiry.
