Product Description

High Tensile Strength 0.3MPa Water Proof Crosslink Fake Grass Underlay 8 MM-20 MM Thickness UV Resistant Food Grade

Why artificial turf systems need to adopt shock-absorbing pad?

1. The shock pad helps the artificial turf system provide superior resilience and impact resistance to reduce the injury which makes the artificial turf system comparable to the natural grass.
2. With shock pad underneath, the resilience and impact resistance of the artificial system can be maintained for long service life.

Athletes deserve the best playing surface available and when it comes to artificial turf sports fields you need to address three primary concerns: impact absorption, traction/stability, and dealing with the dangerously high temperatures found in the old turf systems. Join the movement and let's build a future of safe, high-performance sports fields!

Product Description

Our product is light in weight and convenient to install.
Roll length can be customized according to the specific pitch to ensure no wastage
Excellent shock absorption and ball rebound performance.
No pulverize or rot, long service life.
Closed-cell foam does not absorb water, product installation is more even and not affected by the weather.
Special grooved design ensures the good water permeability, activities can be proceeded in the rainy days.
Flame and UV retardant

Product Features

Layered compound proportion 4:6, to maximize shock absorption and minimize vertical deformation. With double-sided synchronous grooved technology, to enhance the water drainage in four directions while reducing the stress. Cutting slottings vertically and horizontally with holes to make sure water drainage in four directions, and installation more even.

The perfect combination of rubber and resin, as rubber has strong tensile properties, which can not easily be torn during the installation

Adopting a professional ratio of composite process, both to increase the impact of absorption, but also reduce the vertical deformation.

The backing film can enhance the breaking force and it is not easy to be damaged during the installation. It also has excellent UV-resistance and Odor-resistance.

Product Specifications

Model:	T2504B/2506K
Thickness:	8-30 mm
Material:	New environmental friendly PE foam
Density:	30, 50, 70 kg/m ³
Color:	Black and blue or other colors
Features:	Closed cell foam, 3-layer composite, double-sided grooved
Size:	W1.5m * L50m or tailored length
