## Product Description

### 1.Product Description

Material	crossed-linked poly ethylene; eco-friendly
density	30-90kg/m3
thickness	8-15mm thickness
color	blue;red;white;green
length	as your requirement
width	1.5m
style package	in roll
Cloth	can be added , such as geotextile cloth, nylon 3D cloth, aluminum film, PE cloth and so on

### 2.Advantage:

- Product has excellent **shock absorption and ball rebound performance**, bring happiness to the sports and avoid injury, which can be close to the natural grass feeling at the most.
- No pulverize or rot, long life span. **Closed- cell foam** product does not absorb water, which makes the performance more stable, and installation easier.
- Special hole design** ensures the good water permeability , so there is no water on the artificial grass, and activities can be proceeded in the rainy days. Adopting a professional ratio of composite process, not only increase the shock adsorption, but also reduce the vertical deformation.
- Elegant appearance and strong sense of comfort.

3.Package photo

#### 4. Project Photo Show

Till now we have joined more than 3,000 professional sports fields construction and 50 quality of FIFA pitches with our performance shock pad underlay and TPE infill granule as a turf system, as well as landscaping and playground application. Please contact us freely if you have the demand of the material, we hope to be one of your alternative option and provide favors.

Until now, our four pads passed EN15530-4&FIFA2024. We also provide artificial system for you, including artificial grass, shock pad, infill granule and quartz sand.

## 5.Certificate

## Mature quality system control is the guarantee of Taihui's continuous development and improvement

Strict , truth-seeking and unremitting working style is represented in every working procedure of TAIHUI. The highly responsible inspectors concentrate on every part and with the advanced inspection equipment and strict scientific management, every finished product can access to customer.
