Product Description

1.Product Description and Advantage

Material	crossed-linked poly ethylene; eco-friendly
density	30-90kg/m3
thickness	8-15mm thickness
color	blue;red;white;green
length	as your requirement
width	1.5m
style package	in roll
Cloth	can be added , such as geotextile cloth, nylon 3D cloth, aluminum foil, PE cloth and so on

2.Advantage:

- Product has excellent **shock absorption and ball rebound performance**, bring happiness to the sports and avoid injury, which can be close to the natural grass feeling at the most.
- No pulverize or rot, long life span. **Closed- cell foam** product does not absorb water, which makes the performance more stable, and installation easier.
- Special hole design** ensures the good water permeability , so there is no water on the artificial grass, and activities can be proceeded in the rainy days. Adopting a professional ratio of composite process, not only increase the shock adsorption, but also reduce the vertical deformation.
- Elegant appearance and strong sense of comfort.
