Product Description

Product descriptions from the supplier

Product Description

Good environmental performance.

Good recyclability with high recycling value.

High stability.

Stable infill system can guarantee the stability during trampling and running of the athletes, which is comparable to a good natural soccer pitch.

Excellent shock absorption.

Provides excellent ball rebound, just like on natural grass.

Good protection.

Protects players from scratches or abrasions.

High temperature resistance.

Does not overheat in high temperatures, keeping the ground temperature lower than traditional rubber infill.

UV-resistant.

Excellent UV resistance slows down aging, extending the pitch's service life.

Low bulk density.

Hollow shape effectively reduces bulk density and overall costs.

Good coloring.

Colors can be customized.

Solvent and oil resistance.

Good resistance to oil and corrosion.
