Features of Our Pickleball Flooring:

Custom colours – any colour combinations available upon request; logos or special patterns can also be incorporated directly into the court.

Easy installation – each court can be made into 4-strip or 5-strip sets. Simply lay out the strips in order according to the design drawing. No professional installers are required.

Excellent floor adhesion – the material grips flat surfaces immediately after unrolling, providing outstanding ball bounce that closely matches the rebound of acrylic surfaces.

Anti-slip and stain-resistant – the court receives a special “crystal shield” treatment. The anti-slip property ensures quick and safe player movements, while the stain resistance allows easy cleaning to keep the court looking new for a long time.
